

Baked Apple Scavenger Hunt Instructions

1. You will be assigned to breakout rooms.
2. You will be given three questions.
3. Once you find the answers to the questions, return to the main room to verify those answers.
4. Be prepared to share your code.
5. If you're correct, you will receive a prize the likes of which you can only imagine.
6. You can only win once.
7. Please download and use the bakedAppleSampleData_M3.csv file on the course website.
8. There are up to three sets of questions.

Question Set 2

1. What is the median date in the EventDate column?
2. Create a histogram of the number of days that have passed from when the observations were gathered. Hint: Use Sys.Date() to find the current date.
3. Create a bar chart of the number of observations that occur on each day of the week. Use labels, not numbers, for the day of the week.
