Baked Apple Scavenger Hunt Instructions

1. You will be assigned to breakout rooms.
2. You will be given three questions.
3. Once you find the answers to the questions, return to the main room to verify those answers.
4. Be prepared to share your code.
5. If you're correct, you will receive a prize the likes of which you can only imagine.
6. You can only win once.
7. Please download and use the bakedAppleSampleData_M3.csv file on the course website.
8. There are up to three sets of questions.

Question Set 1

1. How many levels of invoices are there?
2. Which warehouse in the Whs column occurs most frequently?
3. Create a bar plot that shows the number of times each item in the ItemorServiceDescription column appears in the data. Show only the top three most frequently occurring items, lump the rest together, and sort the bars in descending order.
